Church School 2:00 p.m.
Bible Worship, 7:30 p.m.
Subject, "The Great Experiment."
The choir will provide appropriate music.
Services will be held at—
Leland, 2:00 p.m.
Social Pines, 3:30 p.m.
You can count on God; you can count on you?
We want you to worship with us.
Rev. Geo. A. Shields, Minister.

Tim McCoy In "The Desert Rider"

This picture is a vivid story of the old West, which has as its theme the trials and hardships encountered by the early white settlers in lower California, in during the establishment of the Spanish land deeds. A beautiful sonnet is made homeless through the daring robbery of the movie express rider, who later finds the girl and endeavors to return the stolen papers.

His reckless adventure takes him into many a perilous position in which he is forced to fight Indians and the lawless whites who terrorized that section of the country for many years. It is an exciting plot and the typical and historical settings lend greatly to the beauty and magnitude of this particularly interesting story.

NOTICE

We regret to report that we have received notice from the film company that film of "The Desert Rider" has been damaged. Play substitute with "Spies," which they say is an excellent substitute. Show starts at 8:15 p.m.

Forks School Report

October

Grade I: Eveline Murdoch, 80; Emerson Calhoun, 79; Edna MacDonald, 72.
J. S. Sanderson, teacher.

Married Peoples' Club

Have Enjoyable Time

The Married Peoples' Club gathered at the theatre on Tuesday night for their bi-monthly meeting. Progressive court whist was played. Winners were Mrs. D. MacRae and Mr. C. R. Moore. Mrs. MacRae and Mrs. W. R. Brodie had tie scores, and in the subsequent draw, Mrs. MacRae was the winner. A very enjoyable dance followed, for which the music was rendered by Chell's orchestra. There was a very good attendance. The committee wish to express their appreciation to Chell's orchestra for the donation of their services on this occasion.

For December 9th, the committee requests that every one of the members attending wear their work-day and wash-day clothes.

Bindloss Seed Fair

A Successful Event

The Bindloss Seed Grain Fair was a very successful event in every respect. The following were placed first in the Cornals competition:
Wheat—L. Mahura
Rye—H. Demarest.
Oats—P. Schneider.
Barley—J. Young.
Flax—Imma Loretson.
Corn—W. J. Hutchison.
Other placings and prize winners and full report will appear in next week's issue.

Farmstead Planning

By Horace L. Seymour, Provincial Director of Town Planning

The term "Farmstead" is used to include that part of the farm that takes in the house and its grounds, herryard and building. Planning for such an area has become an important part of the work of the Provincial Town Planning Office over 50 inspections of surveys were made in 1929, with assistance from some of the district agriculturalists of the Province.

General principles of farmstead planning are illustrated by typical diagrams, and include such matters as plotting and groupings of buildings, sanitation and planting of trees, shrubs and flowers—plans that might take several years to become fully effective, but ones that can be worked out.

Individual plans are prepared for particular locations where, as a rule some permanent buildings have already been erected, and the suggested layout is subsequently influenced thereby.

Those who wish to procure trees for windbreaks or shelter belts free of cost should communicate with Mr. Norman M. Ross, Dominion Government, Forestry Nursery Station, Enniskillen, Ont., before the first of March in the year preceding that in which they wish to plant. As supplied poplars and willows are cuttings, maple, ash and evergreen are seedlings. For conifers or evergreens, such as Scotch pine or white spruce, there is a charge of \$5.00 per hundred, to gether with the usual express or freight charges.

There is no charge for the Provincial planning service, and those farmers interested should communicate with the Director of Town Planning, Parliament Buildings, Edmonton, Alberta, or at Lethbridge.

Curlers' Meeting

A meeting of the Curling Club for the purpose of reorganization took place in the hotel rotunda on Wednesday evening. Mr. D. McEachern was in the chair, and Norris Storey read the report of the last meeting and the statement. J. McNeill was appointed president; W. Acton, vice-president and J. Rauch, secretary-treasurer. It was resolved that a canvass of members be made with a proposal to form ladies' rinks. Matters in this regard and question of rink, etc., to be considered at a further meeting.

Making Ice

The Dominion Experimental Station of Rosheen, has solved the problem of keeping ice cool in a very economical way. On the outside of the dairy room is dug a hole 8 ft. square by ten feet deep, lined with planks, and on the inside of the room and adjoining the outside hole and separated from it only by the plank wall is a hole four feet square and five feet deep.

When very cold weather sets in, usually in December, the outside hole is uncovered and each evening and morning water is sprayed into it to a depth of three quarters of an inch to two inches, depending on the temperature. If this is not frozen next morning or by the evening it is left until it is, and then more added. It may be the end of February before the hole is filled, but there is no hurry. When it is built up to a depth of eight feet a board floor is built over it, but not touching the ice, and the remaining two feet filled with shavings, and then another floor is laid, and over this a roof to turn the rain.

The inside hole being separated from the ice by only the thickness of the plank, retains a temperature of as nearly as low as freezing, and if fitted with two well insulated doors, separated a few inches to form a dead space, affords a splendid means of keeping milk or cream cool.

Care must be exercised to keep the cooling chamber disinfected and free from foul odors and moulds.

The cans of milk or cream should be pre-cooled by placing them in a tank of cold water.

Forms will be made and plans subsequently prepared as soon as practicable.

Novelty Dance

Well Attended

On Friday night, November 21, the Lion Tamers' Club offered their second contribution to the season's festivities, in the form of a novelty dance at the Empress Theatre, which had a very large attendance. The hall was decorated for the occasion, and presented an attractive appearance with its festoons of green and white—the Club's colors.

The music, which was furnished by Chell's Orchestra, began promptly at nine o'clock, and the dancers were pleased with the condition of late dance hits; while the introduction of one or two old-time favorites also brought forth the request for repeated encores. At eleven the crowd took on a gala appearance with the introduction of novelty hits, streamers and noise makers. The dance closed at two a.m., with the crowd still going strong, but consoled by anticipation of the next dance to be given by this organization on New Year's Eve.

Report of Cream Prices

For the week ending Nov. 15th, 1930, the following prices were reported paid by creameries per pound of butterfat, in several grades of cream, and at the points shown:
Jasper Dairy, Edmonton, Special grade, 32c; No. 1, Calgary Creameries, special grade, 28c, No. 1, 27c, No. 2, 24c.
Minimum Special grade, 27c; No. 1, 25c, No. 2, 22c.

before being placed in the cooling chamber.

St. Mary's Church, Empress

Advent Sunday, November 30th.
Evening at 8 p.m.

There will be a Fashioners' Meeting after the service.
Rev. C. M. K. Parsons, Priest-in-Charge.

Open Dance Invitation

Mr. and Mrs. Norris P. Storey invite the public to a Free Dance at the Empress Theatre, on Friday evening, December 12. Everyone welcome. Dance commences at 8:30 sharp.

Make Your Card Selections

We have a very choice assortment of Greeting Cards on hand. We will print your name and address on them on orders of a dozen up at a price below that of card agents. See this selection. They are extremely choice and dainty, you will be disappointed in buying elsewhere.

A Severe Wind Storm

One of the worst windstorms that has visited this district occurred on Saturday night. The wind had great violence and the air was laden with dust. Minor damage was done to several buildings. The doors of the English church were blown open with damage to the interior. The water house and other buildings showed the effect of the wind's force. J. Rauch, had some windows broken in his butcher shop. Various other small damage, such as fence blown down and buildings over-ruled occurred. In the country around, similar condition prevailed.

What Does Your Work Mean To You?

In the current issue of a well known magazine there is an article, bearing the title "Do You Ever Get Off On the Wrong Foot?" which discusses the problems of people who at some stage in their career come to the conclusion that they are square pegs in round holes. In a word, that they do not fit; that they have made a mistake in the choice of their business occupation or professional calling; and, as a result, are not making the progress they feel they should make and their abilities entitle them to make.

On the other hand, a daily newspaper is at present running a series of short sketches of men who in their boyhood or early manhood had ambitions along certain lines, but circumstances, environment, fate, call it what you will, decided otherwise, and instead of being what in those other days they "wanted to be," they have achieved success in radically different walks of life.

In this present period of world-wide depression, a temporary period where we are for the first time feeling and suffering the real aftermath of the Great War, doubtless many people are asking themselves the question: Have I got off on the wrong foot? Am I a square peg in a round hole? Should I make a change, abandon the business, trade of profession in which I am or have been engaged and try something new and different?

Possibly at this time farmers particularly may be inclined to indulge in such questioning as they contemplate the many vicissitudes which agriculture has undergone during the past two years as a result of climatic conditions, marketing difficulties, and a selling price for their products below the actual cost of production. The present outlook may not look promising to them, any more than it does to the city wage-earner. The question, however, which both classes must consider is whether, after all, any change would be better.

For example, if the man engaged in agriculture really likes farming and a rural life, and that degree of independence resulting from the fact that he is his own boss, preferring these to the limitations of a salaried position in town or city, the paid servant of others, and breathing the air of congested centres of population, then he has not made a mistake; he is not a misfit. Nor is the city man in the wrong place if on his part the present life and activities of the farm and the less strenuous life of rural communities makes no appeal to him.

Possibly in both city and country, and with men in all occupations and callings in life, some part at least of their dissatisfaction with their own condition is to be found in their failure to fully grasp all the opportunities of their present position.

In the magazine article to which reference has already been made, the story is told of a man in middle life who, dissatisfied with his position and the progress he was making, came to the parting of the ways. An orphan, forced to make his way at the age of thirteen, he took a humble position in a food commission warehouse. In course of time he became a salesman, acquired a family and a house worth four thousand dollars, and at forty-two was working long hours every day for forty dollars a week. An opportunity presented itself to become produce manager in a newly organized business at fifty dollars a week, but he was required to invest two thousand in the business. He mortgaged his house to raise the money, and took on the new job. But the promoter of the business was inexperienced, and in ten months it failed, with the result that this man lost his money and ruined his life by worry. He then took stock of "himself." He realized he knew a little about a whole lot of vegetables, but did not know everything there was to know about any one of them. So, on the advice of a friend, this man went back to his old job and worked two years more during which time he made close and expert study of one particular vegetable for which there was an all-year-around demand. He learned where the best varieties were grown, and by whom; refrigerating methods; packing methods; costs; who bought that particular variety of vegetable; ways to use it, everything. Then he launched into business in a rented dark basement dealing exclusively in that one particular vegetable. Today he heads a huge and profitable business and is worth hundreds of thousands of dollars.

The point is just this: Is the dissatisfied agricultural farmer in any old way in haphazard fashion, sowing any kind of seed, good and clean or not, using any kind of scrubby, out-of-date, indifferent breeds of poultry, or other farm stock? Is the dissatisfied city artisan, or clerk, or business man, just drifting along, doing what comes to his hand, without giving much heed to the method of doing it? Is the carpenter, for instance, content to be merely a "saw and hammer" man instead of studying and striving to become efficient and an expert in his work? Is the merchant plodding along lines of least resistance but making no mental effort to study the requirements of his particular field and make the most of the facts of his customers?

In a word, are we treating our present occupations in life merely and solely as a means of physical existence in life, or are we finding some real pleasure and satisfaction in the work itself? If the former is our approach to our work, we will, of course, be dissatisfied with it and with ourselves, and ultimate failure must result. If, on the other hand, the work itself means something to us, and we take a keen interest in it, study it and possibilities, constantly strive for its improvement, then satisfaction will result, leading to contentment and success.

While there are exceptions to the general rule, that general rule is that it is not so much the nature of the work in which we are engaged that counts, as our attitude towards that work which makes for dissatisfaction and failure on the one hand or satisfaction and ultimate success on the other hand.

The Aeroplane and Geodesy

Problem Of Survey Work In Remote Districts Has Been Solved

The aeroplane has solved one of the problems of the Geodesic Survey of Canada. In those districts which are traversed by neither roads nor railways, travel is slow and at times almost impossible. Obstruction is met everywhere in measuring the points in the great triangulation net which is gradually covering the whole of the Dominion. By means of the aeroplane most of these difficulties have been set aside.

UTTERLY WORN OUT

Women Weakened By Worry

"I don't want to worry, but I can't help it," said a woman recently when told to take things easy and not worry. It is the duty of every woman to save her strength. If she finds herself getting depressed, if she feels utterly worn out, worried, over-tired and frequently has nervous headaches, she will be well to take these Pills not only to refresh and feed and strengthen the nerves and banish the cause of nervous disorders.

Women cannot always rest when they are worried, but every woman can maintain her strength by the help of Dr. Williams' Pink Pills. Start taking these Pills now and see how soon improvement will show by increased energy, keen appetite, robust, steady nerves and robust health. These Pills are sold by medicine dealers or by mail, postpaid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Progressive Estate

Three New Industrial Plants Operated At Recent Ceremony

The town of Estevan on September 24th opened three new industrial plants at a ceremony attended by the Hon. J. G. Macdonald, Minister of the Interior, and other prominent men of Western Canada. The "Mercury" in a special issue notes the recent progress of this town of 30,000 persons, the extent of whose agricultural and mineral wealth is only beginning to be realized. Among other things, it boasts of having the only plant in Canada making stone-grey building brick and of having the largest sawmills in the Dominion.

The man who makes a better job out of the job he has instead of always looking for a better job is the man who succeeds.

Winter Holiday Trips

Canadian Pacific Offers Special Inducements To The Winter Traveler

Sharp stimulus to winter travel in Western Canada this year is forecast by Canadian Pacific Railway officials in Winnipeg, chief among the contributing factors being the many special trains arranged to connect with special sailings to the Dominion for Christmas and New Year's. While this rail movement will be eastery, there are also many interesting winter features in the west that annually bring thousands of easterners, Canadians and Americans, to the winter playground of the northwest.

The Banff Carnival is now known all over the civilized world, and another western winter sporting event that has become firmly fixed on the calendar is the mid-winter golf tournament, sponsored by the Canadian Pacific Hotels. At Victoria, capital City of British Columbia.

This tournament, started in 1928, enters its third year next February, when, from February 28 to 28, a host of golfers will gather in the Pacific Northwest in quest of the Beatty challenge trophy. The tournament is being held this season at the Oak Bay course of the Victoria Golf Club, where all-winter golfing has been the feature attractions of Vancouver Island's evergreen playground.

As a special inducement to winter travellers, low round trip fares have been named by the Company to Eastern Canada and Central States, commencing December 1st, and to the Pacific Coast during December, January and part of February. These tickets are considerably lower in price than the ordinary fare and bear a much longer limit.

Conquers Asthma. To be relieved from the terrible suffocating due to asthma, Dr. J. D. Kellogg's "Asthma Remedy" is safe-guarded for the future is even greater. Not only does Dr. J. D. Kellogg's "Asthma Remedy" bring prompt relief, but it introduces a new era of life for the afflicted. It is a remedy for the inhalation of smoke or fumes from the newly prevalent pre-treatments and other effects a permanent cure.

Canadian Trade Office For Egypt

Dominion Has 34 Trade Commissioners in Different Parts Of The World

A new Canadian Government Trade Commissioner's office is to be opened at Cairo, Egypt. The territory for this new office, which will open some time next December, includes Egypt, the Sudan, Palestine, Syria, Iraq and Persia. When the Canadian Trade Commissioner takes over at Cairo, Canada will have 34 trade commissioners in different parts of the world and a commercial agent at Sydney, Australia. These commissioners function under the Commercial Intelligence Service of the Canadian Government Department of Trade and Commerce, which is designed to further the trade and financial conditions in their respective territories and keep Canadian manufacturers and exporters advised concerning opportunities for sale of Canadian products. Canada's foreign trade in 1929 was \$256 per capita, the highest in the world.

Trying All Ways

Mr. Newlywed: Is the steak ready now, dear?

Mr. Newlywed: I'm sorry I'm so long, George, but it looked hopeless grilled, and it doesn't look much better fried, but if you'll be patient a little longer, I'll see what boiling does to it.

Persian Balm is inevitably chosen by discerning women. Delightful to use. Subtly fragrant. Cooling and refreshing. Imparts a rare youthful bloom to the complexion. Indispensable for softening and making hands flawless. For the face, it is the most perfect skin. Useful for the family also. Protects the tender skin of children and is excellent for the father as a hair restorative and cooling shaving lotion.

U.S.A. Manufacturers For Manitoba

A special publicity campaign, aiming at the establishment of American manufacturing plants in the Province of Manitoba, is to be launched by the Industrial Development Board of the province.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother's Grain Worm Expeller.

Population Of Moose Jaw

According to the 1926 Henderson Directory, the population of the City of Moose Jaw is shown as 26,140, an increase of 3,497 over 1920.

Brain workers live long. Thomas Edison is 83. Sir Oliver Lodge is 79. Bernard Shaw is 74. And other scientists and brain workers are well past the 60-year mark.

Banish pain with Minna's Liniment.

People Need Products

Russia Is Selling

Soviet Trade That Method To Raise Money For Treasury

Soviet dumping of wheat and other products abroad at a time when the supplies are urgently needed in Russia itself is in the nature of "tax" collection under the Russian system, says the Financial Post, which continues:

In Soviet Russia, the word taxation has no such meaning as Western minds attach to it. Holding private ownership to be unethical, the government itself is officially the owner of all property. Consequently, there is none for it to tax. Proclaiming private profits to be opposed to human welfare, it officially permits the accumulation of no incomes which might be taxed. It is obliged, therefore, to obtain its revenue from the actual products of the mines, forests, and farms which it operates or to take as taxes the profits of those who still operate privately—mainly the unutilized peasants. But since it cannot operate a trustworthy system with wheat and lumber, it must sell these articles in the outside world.

"This is what it is doing to the extent of leaving open to thousands of people on the verge of starvation. Officially they are permitted to eat only what is destined to them by the government, and the heavy purchases of machinery abroad mean that people at home must be kept to the very lowest limit of supplies."

For Dry Skin—Minna's Liniment.

Turner Valley Oil

Seven Thousand Acres Definitely Proved As Large Producer Of Gas and Oil

Following a tour of the Turner Valley Oil Area, a Beeby Thompson, a member of the British Council of Petroleum Technologists, declared that 7,000 acres of terrain had been definitely proved as a large producer of gas and oil. Productivity, since the beginning of drilling operations, amounted to 3,000,000 barrels of a value of \$10,000,000, the present rate of production being about 3,000 barrels per day from about 65 wells.

Her Two Children Had Summer Complaint

Mrs. J. MacDonald, Glace Bay, N.S., writes: "I am the mother of six children, and would not be without Dr. Fowler's Strawberry in the house. My two youngest were very sick with summer complaint, and there was nothing I tried could equal that remedy, and I had tried most everything, but they could get no relief. Dr. Fowler's made a change in both of them in less than two hours."

Old Milestone Found

Supposed To Indicate Distance From Chiappa, Italy To Rome

Quite recently a most interesting discovery was made in Chiappa, Italy. During excavations some stone was brought to light an old marble milestone. On the stone could still be distinguished the marking of 553 miles and the name of Augustus Caesar. Presumably the stone indicated the distance from that spot to Rome, and formed part of the old road running between Rome and the Gallic countries, and known then as the Via Aurelia.

Ready-Made Medicine.

You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Electric Oil. For coughs, colds, sore throat, bronchitis, asthma, it is invaluable; for scalds, burns, bruises, sprains it is unsurpassed; while for cuts, sores and the like it is an unquestionable balm. It needs no recommendation other than the use and that will satisfy anyone as to its effectiveness.

When everybody is doubtful or scared—then is the time to buy a home, good goods and sound securities.

Butter can now be made without churning by a centrifugal process.

Wheat Drying Plan Is Under Consideration, But Thought Impracticable

Ottawa, Oct.—Even by pressing into service every wheat-drying facility in Western Canada, it would be impossible to handle within two or perhaps three years the estimated total of grain that has been damaged by snow and excessive rains this fall, officials of the Department of Agriculture here said recently.

This opinion was delivered while discussing the plan suggested to the Federal Government by Hon. George Hoadley, Minister of Agriculture of Alberta.

He suggested the Dominion bear the whole cost of drying wheat at terminal elevators so that threatening crops may be resumed at once. Hon. Robert Weir, Minister of Agriculture, is away from Ottawa for the week-end, but it is understood he sent a telegram to the Alberta minister informing him his scheme was under departmental consideration. Although no official verdict on Mr. Hoadley's plan could be secured, it was stated in well-informed circles that the plan as suggested, will not be placed in effect.

The Federal Department of Agriculture, however, has been working on the western wheat situation for some time and some measure of relief possibly will be advanced the farmers.

The Minister of Agriculture will take up the Alberta suggestion in detail. Officials of his department said the plan had many angles, such as loss due to shrinkage and consequent loss in railway rates. All this will have to be considered in detail before any decision is rendered.

Postpone Return Flight

Capt. Errol Boyd Will Not Attempt Trip This Year
London, England.—Captain J. Errol Boyd and Lieutenant Harry P. Connor, who were planning to make a return flight across the Atlantic early next month, have definitely postponed the attempt until next spring.

The two men who flew from England from Harbor Grace, Nfld., 10 days ago, had been planning to use their monoplane "Columbia" for the first round-trip North Atlantic attempt. When the storm eventually made the return flight they will be so owners of the "Columbia," for Sherwin Collingham, aviation enthusiast in Montreal, has bought the veteran plane from Charles A. Levine and presented it to Boyd and Connor on condition that they do not fly in the Atlantic again this year.

Boyd and Connor plan to sail for Canada, October 21, returning to England in the spring.

Sir Arthur Currie

To Visit British India

Chosen As Canada's Representative At Inauguration Ceremonies Of New Dominion

Ottawa, Ont.—The Dominion Government has requested General Sir Arthur Currie, commander-in-chief of the Canadian forces during the war, to represent Canada at the ceremonies in connection with the inauguration of New Delhi as the capital of British India and the opening of the new government buildings there. General Currie has accepted the invitation and will undertake the mission.

Dump Duty Assessed By Canadian Customs On New Zealand Butter

Vancouver, B.C.—A dump duty of 40 cents per 40-pound box was assessed by the Canadian customs on the 38,000 boxes of New Zealand butter which arrived on the Niagara on October 11.

This was in addition to the regular duty of one cent under the 1924 treaty tariff, which expired on October 12, and represented approximately \$10,000 added import on the 2,000,000 pounds of butter in the big shipment which arrived just in time to avoid the new duty of 8 cents a pound.

Local butter importers who have conferred with Hon. E. B. Ryckman, Minister of National Revenue, during his visit here, explain that the dump duty was assessed when it was discovered that the invoice price of the butter was four-fifths of the fair market price in New Zealand at the time of shipment, as

Would Prepare For War

General Pershing Is Firm Believer In Preparedness

New York, N.Y.—A warning to the United States that it will be caught unprepared in event of another war, is sounded by General John J. Pershing, in an interview published recently.

"People say we should disarm," the leader of the United States armies in the Great War is quoted as saying. "America already is disarmed. Good men and good women will tell us that we should throw away our armaments. We have very little to throw away."

He is not alone in his opinion. "We know that we will not provoke war. But what is there in history which authorizes us to conclude that someone else will not provoke one of these days? It is not a question of whether or not we believe in war. It is a question whether we shall defend this wonderful country if some other nation which does believe in war should attack us."

Customary Two Minutes Silence

People Requested To Mark Armistice Day As Usual

Ottawa, Ont.—Canada will observe the customary two-minutes' silence on the morning of Armistice Day, Tuesday, November 11. The following statement in respect to it, has been issued from the office of the Prime Minister: "In accordance with arrangements for the observance of Armistice Day, sanctioned by His Majesty the King, the people of Canada are invited to mark the occasion by a two-minutes' silence at 11 a.m. on Tuesday, November 11, 1920."

Will Open Textile Mill

English Workers Would Bring Own Workmen To Canada

Ottawa, Ont.—Admission to Canada of a limited number of skilled textile workers is being sought by the English firm which has purchased a textile plant at Carlton Place. The mill, which has been closed for some time, will be reopened shortly and will employ 360 hands.

The company wishes to bring from its home plant about 25 people. They will work on the manufacture of woollen coatings and other cloth of a kind never before made in this country.

Forming Farm Boards

Prairie Provinces Stand Ready To Help Farmers Financially

Winnipeg, Man.—All three prairie provinces stand ready to assist western farmers in their financial predicament brought on by low prices of grain and livestock. Saskatchewan has had a debt-adjustment bureau in force for some time and Manitoba now has set up a parallel board to aid needy farmers and to effect fair distribution of credit and collections.

The newest entry into the list is Alberta's agricultural development board, whose formation has been announced.

Lake Winnipeg Tragedy

Two Fishermen Drown When They Leaped From Burning Boat

Winnipeg, Man.—From the blazing deck of the tug "Magnus" four fishermen leaped into the chill waters of Lake Winnipeg, near Gimli. Two were drowned and the other pair were dragged half-dead from the icy water by another tug which rushed to the rescue. The "Magnus" sank after a gasoline explosion shattered the craft from stem to stern.

The dead: Captain William Bjornson, Engineer Joe Bell.

The rescue tug "Goldfield," summoned by frenzied blasts from the ill-fated "Magnus" dived, saved Martin Johnson and Ole Kardell, surviving members of the crew. Bodies of Captain Bjornson and Engineer Bell have not been recovered. The tug, gasoline-propelled launch-tug had caught fire below deck soon after it left Gimli on October 22, but the blaze was not discovered for some time, until it was too late to halt progress of the flames. The "Magnus," owned by the Armstrong-Gimli Fisheries Company, was northbound for the fishing waters at the far end of Lake Winnipeg. The tug, laden with fishing supplies for the winter, will be a total loss.

British Airship Workers Worried

Disaster To R-101 May Mean Reduction In Staff

Cardington, England.—Eight hundred workers of the Royal Airship works here and their families are undergoing an anxious time pending decision of the future of airship development following the disaster to the R-101.

Officials of the works met secretly and the fact they also kept their conclusions. If, any, to themselves, were to increase the apprehension.

It is rumored there is a proposal to cut labor down by 20 per cent. immediately and, in the circumstances, the workers are profoundly anxious to see an early commencement of the official air ministry enquiry into the R-101 disaster, delay in which is beginning to result in newspaper criticism.

Offers Home For Research

Wealthy Buffalo Woman Anxious To Aid Cancer Experts

New York.—The New York "American" says: Mrs. Grace J. Conners, widow of William J. Conners, Jr., Buffalo, N.Y., newspaper publisher, financier and political leader, has offered to turn her \$1,000,000 Long Island mansion into one of the most complete cancer research institutes in the world. She made the offer to Doctors Walter B. Coffey and John Humber, of San Francisco, who have made some notable discoveries in cancer research.

Opposed To British Policy

Jerusalem, Palestine.—The National Council of Palestine Jews after a meeting which lasted eight days, decided unanimously to reject the British policy in Palestine and not to participate in the proposed legislative council.

AT IMPERIAL CONFERENCE

Photograph reproduced above shows Prime Minister Ramsay MacDonald (right), of Great Britain, and Prime Minister R. B. Bennett of Canada, as they appeared chatting outside the foreign office in London, just before the big empire conference was due to open.

TRANS-ATLANTIC FLYER

Capt. J. Errol Boyd, Toronto flier, who, with Harry Connor, United States airman, successfully flew the Atlantic in seaplane "Columbia," but who was forced down in Cornwall from engine trouble, just a few miles of their ultimate goal—Croydon.

Steel Laying Proceeding

Work On C.N.R. Extension From Unity To Near Alberta Boundary

Salvador, Sask.—The laying of steel on the C.N.R. extension from 30 miles southwest, commenced on Monday, October 20. It is expected that the snow on right-of-way will slow down the progress to about a mile a day. The steel is being laid from Unity to mile 52, near the Alberta boundary, and should cross the C.P.R. one mile west of here in less than a month.

With 1,000,000 bushels of grain under the snow here and there is a great, the new branch will be a unit sent to those farmers who have and a long haul for years.

Automobile Production Down

Fewer Cars Produced In September Than Any Month In Year

Ottawa, Ont.—Canada produced fewer automobiles in September than in any month this year, it was shown in a report published recently by the Dominion Bureau of Statistics. The total was 7,857 cars, being 19 per cent. lower than for August, and 42 per cent. lower than for September, 1920.

Likewise production figures for the first nine months of the year showed substantial reductions over 1920 totals. To the end of September Canadian plants produced 138,622 cars, compared with 233,833 cars for the same period last year. This reduction amounts to 41 per cent.

To Study Bulk Buying

London, England.—A special Imperial conference sub-committee has been appointed to report on bulk purchase, import, boards and quotas for British purchases of canned fruit, canned fish, butter, cheese, eggs, bacon, poultry and fresh fruit. Canada will be represented on the sub-committee.

Government Of Brazil Is Overthrown And Military Junta Rules

Would Secure Textile Mills

Premier Told Says British Columbia Offers Excellent Opportunities

Victoria, B.C.—Premier R. F. Tolmie, being here from Ottawa, said several old established textile firms were considering moving from the Old Country as a result of foreign competition is taking steps to place before them the advantage offered by British Columbia for the manufacture of woollen goods.

The Premier is calling G. H. Hirst & Co., Ltd., operating in the three towns of Bristol, Batley and Dewsbury, which firm has already announced that it will close its mills at the former place and transfer the plant to Canada. He is issuing instructions to several departments of the governmental service to bring all possible information in connection with the woollen industry up to date. This information will be forwarded to the agent-general in British Columbia in London, to be placed before the heads of the woollen industry there.

"With a sheep population of the province increasing at a most satisfactory rate, with a climate admirably suited for woollen manufacture and likewise with water of the utmost purity obtainable," said the Premier, "British Columbia offers excellent opportunities not excelled in any place in the world for the production of cloth."

Some idea of the rapid advances in the past three years in the development of the sheep industry may be obtained from the fact that in 1917 there were 120,132 sheep in British Columbia, while in 1920 there were 265,125. The wool clip in 1920 was valued at \$105,161, and last year it was valued at \$244,185.

"If these British manufacturers propose to leave the Old Country for Canada," said Premier Tolmie, "we are going to try to get some of them to locate here. There is no reason with the advantages that we have, why we should not become a great textile centre."

Grain Grading High

Northern Wheat Grades Good Average After The Hail

St. Albert, Sask.—Grain, threshed before the blizzard, is grading high at local elevators contrary to expectation of some of the most optimists. At the Pool elevator a number of loads of wheat threshed since the rains have been marketed at prices well above the average. The elevators are grading No. 2 Northern and No. 3 with little and in some cases no evidence of sprouting.

Elevator officials estimate the average has been No. 3 and that this will be maintained after threshing ceases. Garnet is holding up exceptionally well, this species averaging No. 2 Northern. Wheat is a stalked crop. It is estimated, will be assured of a No. 2 average.

Photograph Total Eclipse Of Sun

Nihoa Island.—Weeks of patient waiting and this little island in the South Pacific was rewarded Oct. 21, when 41 photographs of a total eclipse of the sun were taken successfully.

Decline In Number Of Assisted Migrants From British Isles

London, England.—There has been a pronounced decline in the number of assisted migrants who have left the shores of Britain for the Dominions in the last four years, according to figures submitted to the overseas settlement committee of the Imperial Conference.

The less attractive economic conditions to be found in the L. dominions in the last year, or so was largely blamed for the drop.

State-aided migration to Canada in 1927 totalled 27,615 persons, while 29,132 went to Australia and 4,446 to New Zealand. Last year 21,615 migrants went to Canada, 13,525 to Australia and 1,840 to New Zealand. Of the three countries, it will be seen that Canada suffered least by the drop. It is explained further that 37,000 additional persons went to Canada in 1929 under the temporary fare rate, which really reveals

Rio De Janeiro—A military junta

ruled Rio De Janeiro after overthrowing President Washington Luis in a coup d'état accompanied by rioting and some arson.

The president bowed to the will of the military junta that overthrew his administration and left Guanabara Palace, from which he had previously declared himself would only be taken as a bound prisoner. He was taken under heavily armed escort to Fort Copacabana, where he was held in the quarters of the general staff.

Vice-President Melo Vianna and all the members of the Washington Luis cabinet, were arrested. Several senators and deputies sympathizing with the administration were also held.

Thus, as chief of the army, were provisionally in charge of the capital of a great South American country, apparently with the entire army and navy behind them. Three generals, Leite de Castro, Pantaleão Telles and Menna Barreto, comprise the junta which will control the government until they are able to confer with representatives of Rio Grande Do Sul, Minas Geraes and other states which opened the revolt three weeks ago. They hope as a result to establish a civil government.

Some officials already have been named—Gabriel Bernardes as Minister of Justice, and Colonel Sotero de Faria as chief of the army.

With the fall of the government at Rio De Janeiro, federal leaders in the great city of São Paulo capitulated after three weeks of running a white flag over the Government House.

Two of Brazil's two largest cities, which were virtually all that was left to President Washington Luis, following the spread of the revolt begun October 3, in the southern states, turned against the government and it went out after a stand of three weeks.

Shamrock Reaches Home

Battled With Bad Weather and Stormy Seas All The Way Across

Southampton, Eng.—Battered by terrific seas encountered on her way across the Atlantic, the "Shamrock" arrived in Southampton on Monday, when she was 24 hours out of Bristol, Rhode Island.

Captain William Greenock, who brought the America's Cup challenge, home, said that the yacht ran into bad weather practically all the way over. At times the boat was held to a standstill.

"It was no pleasure cruise," he said. "I don't think the weather could have been more unkind for us struck a bad patch just after leaving America."

The Shamrock will be taken to a shipyard for the winter. All aboard were reported well.

Boys Remaining On Farms

Toronto, Ontario, 775 "home boys" brought to Canada by the United Church in co-operation with the Y.M.C.A., during the past year, are still pursuing agriculture. They have \$28,000 in savings deposited in banks, says the report of the immigration committee of the Home Mission Board of the United Church, to a meeting of the Home Mission's executive.

Administration Of Lands And Other Resources Of The West Passes Under Provincial Control

The present year terminates the administration by the Dominion Government of the lands and other resources of the three Prairie Provinces, and of the areas in British Columbia known as the Peace River Block and the Railway Belt. These resources now pass under provincial control.

One of the notable changes involv-

ed is that the historic Dominion home stead policy now gives way to such land policies as may be framed by the several provinces. For nearly thirty years the homestead system has played a cardinal role in the disposal of what have been known as "Dominion Lands," and in the advance of Canadian development. Since 1900 nearly 65,000 homestead entries have been made, and while many of

these were never completed the magnitude of the land business may be judged from the fact that the entries represent, at 160 acres each, nearly 10,000,000 acres of land.

As the accompanying diagram shows, homestead activity reached its peak in the three or four years immediately preceding the war. While the last two years have brought a decided drop in the number of entries,

the post-war period, generally speaking, has witnessed only a moderate degree of homesteading activity. The rate and fall of homestead entries illustrates perhaps better than anything else the fact that in more recent years the granting of homesteads has not been the all-absorbing task for the Department of the Interior that it was fifteen or twenty years ago.

A New Yorker On Canada

Points Out Several Points Of Superstition Over U.S.

Charles Johnston, who is one of the most scholarly of New York reviewers, contributes an article to the New York Times Book Review on the Cambridge history volumes on Canada and Newfoundland. He gathers from "this admirable historical study," that the Canadian view of American affairs, which has a certain definite atmosphere, which may, perhaps, be described as modest superiority. Not that there is any boasting. The points of superiority simply emerge in passing. For example, we set some store by the year 1902, underlining its significance by an annual holiday. The Canadian date is 1472, when John Seab, the Dane, reached Canadian territory in the region of Labrador. We commemorate the founding of Jamestown in 1607, and of the Pilgrim State in 1620. But the year 1534 marks "the birth of Canada." Asia we celebrate July 4, but here also, Canada outstrip us, for July 3 is the birthday of Quebec, but that the area of Canada is greater not only than that of the United States includes its dependency Alaska—indeed, it may be added, also greater than Brazil, the third largest country in the Western Hemisphere.

Canadian "Pingos"

Small Fresh Water Lakes Found Along Coast Of Arctic Ocean

Pingos are conical sand or gravel hills which rise sometimes as high as 100 feet above the swampy ground skirting the shore of the Arctic Ocean, particularly that part of the coast eastward from the Mackenzie River to Cape Bathurst in the North West territories of Canada. The summits are hollowed out like a crater, and always contain a small lake of fresh water. As all the lakes in the vicinity are more or less briny, the natives have been known to walk long distances to get their drinking water from the pingos. The origin of these hills remains an unsolved puzzle.

A recent wild-life census indicates that more than a million geese and mall birds in the national forests of this country.

Absent-Minded Professor Of To-Narrow
"There now, Adolar, you have forgotten your parachute again,"—Hummel, Hamburg.

W. N. U. 1861

Disturbing Nature's Balance

Disasters Result From Failure To Introduce Of Insects Or Animals From Foreign Climes

A scientist of the Academy of Natural Sciences of Philadelphia brings from the West Indies an account of another of the many recorded instances of the unfortunate results of man's interference with the "balance of nature." Monkeys, the offspring of animals supposed to have been liberated by sailors or slave traders many years ago, and the mongoose, brought from India to cope with an excess of rats and snakes, are both said to have preyed to such an extent upon the birds and their nests that certain species of the birds have been virtually exterminated or driven to other localities.

One of the best known instances of the disastrous results of the artificial upset of the balance of nature is found in the rabbit pest of Australia and New Zealand. These animals, introduced originally for food or for sport, have increased to such an extent that great areas have been spent in a vain effort to eradicate them. Such occurrences justify the skepticism that is always attendant upon the use of animals brought from distant climes to cope with pests. There is always the peril of creating a new and more serious pest.—New York Evening Post.

New Machinery Needed

Development Of Flax And Hemp Making Machinery Offers Opportunity

In handling crops such as flax and hemp when so much labour is involved, the need of new machinery that will lower the cost of production cannot be overemphasized, observes the Fibre Specialist of the Dominion Department of Agriculture, in his annual report. Special attention is now being given to the processing of flax and hemp at the present time, and it is expected that some way of speeding up production in scutching and retting will soon be found. The development of flax and hemp machinery provides one of the greatest opportunities to Canadian enterprise at the present time.

Good Business
Seeing a sign in a window reading "Go Home," young Goudin went in and told the man behind the fountain of the misapprehension. "Has anyone told you of it before?" Goudin asked.

"Hundreds," replied the clerk. "But whenever they drop in to tell me, they always spend something. What'll you have today?"

Conscience Wakes Up
It is not only evildoers of income tax who sometimes become conscience-stricken and make restitution after the lapse of a long period of time. At a recent meeting of the Vancouver public library board, the librarian reported that 34 books which had been stolen from the library in 1908, had recently been returned.

The oyster may be dumb in some ways, but it has been known to get a four month's vacation.

Reassurance For Wheat Growers Of Canada

No Cause For Realism Says Well-Informed Bank Official

There is reassurance for Canadian wheat growers and, therefore, for the whole of Canada in the review of world market conditions given to the Toronto Mail and Empire by Mr. P. Alley, assistant general manager of the Canadian Bank of Commerce. As Mr. Alley has charge of the bank's business throughout western Canada, and as he must, therefore, be specially well-informed regarding the wheat export trade, his remarks upon the existing situation may be accepted as authoritative. Without presuming to speak dogmatically, he points out several industrial factors in the marketing developments of recent months. One of these factors is that the high prices which prevailed for wheat not so long ago induced an over-production of that commodity throughout the world. It brought into the field countries where the cost of production is high, and which cannot profitably produce wheat for sale at normal quotations. Another thing is that in spite of prices so high that they discourage exportation, Canada last year exported more than the year's entire crop. Marketing prospects have improved in the importing countries of Europe and also in Japan and China. Nor Russia likely soon to be as important a competitor in Liverpool or anywhere else. The fact that the Canadian crop is considerably larger than the high quality of it is of a particularly high quality, this means that other things being equal and prices being as low as they are, Canadian wheat should take the lead on all buying markets from this time forward. All things considered, therefore, there seems to be every reason for hoping that a few months hence Canada may be back on the world's market, exporting more wheat and wheat flour than any other nation on earth.—Toronto Mail and Empire.

Number Of Farms Reduced

United States Census Bureau Reports Decrease Of 2.3 Per Cent. Since 1920

A reduction in five years of 73,763, or 1.2 per cent, in the number of farms in the United States was reported by the census bureau on the basis of complete returns from the 48 states and the District of Columbia. The farms, which, under the census bureau definition, means a tract of land used for agricultural purposes consisting of more than three acres or producing crops valued at \$200 or more, totaled 6,297,877 as compared with 6,371,640 in 1925, when the last census of farms was taken. This was a decrease of 2.3 per cent. In the number of farms since 1920, when the total was 6,448,313.

Better Class Of Hunters And Jumpers Being Bred

Both in number and in quality the situation in Canada as regards hunting and jumping horses is improving. It was stated by Lieut-Col. Frank Moss, Toronto, secretary of the Canadian Hunter, Saddle and Light Horse Improvement Society, who spoke on the work of his organization to delegates of the Canadian Cavalry Association in annual convention at Ottawa.

Colonel Moss said the society, with the aid of government grants, was generally making progress in its aim to interest the farming community in the breeding of hunters. Practically 50 per cent. of all hunters bred on farms were suited for cavalry work, he said.

New Style Railway Coach

A railway coach, shaped like a Zeppelin, with a 500-horsepower aeroplane motor and driven by a propeller, was tested on a five-mile stretch of rails near Hanover, Germany. Carrying 25 passengers, it attained a speed of 55 miles an hour within a couple of minutes after starting. Machines of this type may be used on regular rail lines for fast passenger transport.

Highway Expenditures

Saskatchewan's Appropriation Of Ten Millions For The Year 1930 New

Nearly Exhausted
Saskatchewan's 1930 highway appropriation of \$10,000,000 virtually has been expended as the programme submitted and piloted through the legislature by Hon. A. C. Stewart, Minister of Highways, nears completion. Of the \$10,000,000 voted by the House at the last session, \$9,277,963 has been expended to date and the remainder will be exhausted on work to be done this fall, according to a statement issued by Mr. Stewart. In the amount expended is \$500,000 for new bridges, \$150,000 for the purchase of trucks and equipment with relief road camps.

Blood makes the round of the human body about once every half minute.

Portugal and Austria have just been connected by telephone.

ARCHITECTURAL SCULPTOR

Siam Will Exhibit Rice

Best Varieties Will Be Sent To World's Grain Exhibition

Announcement has been made from the office of the World's Grain Exhibition and Conference of the acceptance by the Kingdom of Siam of the invitation to participate in the world's grain show to be held at Regina in 1932.

According to advice received from B. C. Butler, assistant Canadian government Trade Commissioner at Havana, Java, the Ministry of Lands and Agriculture of Siam has decided to send an exhibit to Regina at the time of the 1932 world-wide event.

The exhibit will take the form of a display of varieties of Siam best rice and glutinous rice. In addition it is highly probable that an officer of the agricultural ministry will visit Regina in charge of the exhibit. The question is now under consideration by the ministry, according to Mr. Butler's communication.

With the acceptance by Siam of the invitation to take part in the world's grain show in 1932, the total number of countries already accepting the invitation of the organization reaches ten.

"Rice, which will form the exhibit of the Siam Kingdom at the grain exhibition and conference in 1932, forms the chief product of the country, being the national food and staple article of export. Over \$75,000,000 worth of rice was exported from Siam last year to different parts of the world, some 20,000,000 acres of land being devoted to rice cultivation.

One of the most useful publications which has been published by the Federal Department of Agriculture recently is the fifth in the series of studies in plant diseases being carried out under the direction of the Dominion Botanist. This study deals with "Control methods for diseases of cereals, forage and fibre crops." It contains the latest findings of the Dominion Research Laboratories of plant pathology at Winnipeg, Saskatoon and Edmonton. The subjects dealt with include not only general rules useful in the control and eradication of cereal diseases, but specific recommendations for the treatment of a wide variety of specific cereal diseases. The crops dealt with include wheat, oats, barley, rye, corn, millet, flax, sunflowers, alfalfa, sweet clover and common clover. This circular, No. 123 New Series, is available without charge on application to the Publications Branch of the Department at Ottawa.

Recent reports show that the Province of Saskatchewan has grown from 60,000 farms in operation with 2,000,000 acres in crop when the province was organized in 1905 to 118,000 farms with 30,000,000 acres under cultivation at the present time. Also, the province is now organized along agricultural lines; the wheat pool having 80,000 members while various other farmers' organizations are operating to the benefit of the producers.

Life is Labor-Saving Device

The latest invention to take some of the work of a man's hands is a cigarette which doesn't need the use of a match or cigarette lighter. It is tipped with a special preparation which, when rubbed gently along the side of the package lights it once.

Gasoline is being sold in Bogota, Colombia, at 47 cents a gallon.

Canada Is Anxious For Penny Post Re-Establishment Throughout The Empire

Found That A Liberal Use Teaches Boys Self-Respect In England

It is to the splendid advertisement of a firm (of a very strange coincidence), soap manufacturers that we owe the news of the general awakening to the worldwide significance of soap. These advertisements brought to our notice a fact of the utmost value, hitherto overlooked. The fact was this: Soap teaches boys self-respect.

Even though it ostensibly referred only to one kind of soap, I find it impossible to exaggerate the immediate and salutary effect this advertisement has upon the national attitude. Grubby boys throughout the country were sternly commanded to wash; boys who had already washed were sent to wash again. A wave of self-respect began to sweep over the youth of England. Legions of atomized and aggrieved atomizers sat down and recorded, in letters to the manufacturers concerned their grateful amazement at the way in which not only self-respect, but integrity, sterling worthy piety, benevolence, sportsmanship, kindness to animals and extraordinary mathematical ability began to show themselves in lads as soon as they began to wash with soap.—From G. K.'s Weekly.

E. S. Sexton Proprietor A. Hankin

Thursday, Nov. 27, 1930

Mr. and Mrs. Wendell McRae
have taken up residence in
town.

The opening of the Catholic
Hospital, at Pielate, took place
on Tuesday.

Mr. Emerson McCune, of Ab-
bey, was a visitor in town for
a few days last week.

The Ladies' of the Congrega-
tion will hold their meeting on
Thursday, December 4th, at
3:30 p.m., at the home of Mrs.
Wm. Acton.

Mrs. A. McKinnon and son
left on Thursday morning's
train for Creston, B.C., to join
Mr. McKinnon.

The Empress Chapter of the
I.O.O.F., will hold their regular
monthly meeting at the home
of Mrs. Ernest McGill, on Tues-
day, December 2nd, at 8:00 p.m.
Mr. Seizewald, of Buffalo,
Alta., was a visitor in town on
Wednesday, he reports that
good progress is being made
with the preparatory work of
the bridge across the river
there.

Dr. and Mrs. A. L. Caldwell,
arrived in town on Saturday
night, and visited with Mr. and
Mrs. T. Rowles. They proceed-
ed by car to Loversen on Sun-
day, where they visited with
Dr. Caldwell's people. They
returned to Gabri on Tuesday.

Mr. and Mrs. Owen Stewart
and family, of Seattle, are
visiting with relatives in town.
Mr. O. Stewart reports that
they had a good crop of oats
and feed, and are turning their
attention to cattle.

AT LEARNER

Saturdays, Mondays and Tuesdays

Mr. and Mrs. F. Pawlak, sons,
Jerome and John, made a trip
to Medicine Hat, on Friday,
by car. Returning home on
Saturday evening they got caught
in the wind and dust storm
and were stalled about three
miles out of town, Mr. Pawlak
had to make his way into town
and get assistance. The Misses
Vinday were also stalled in
their car and returned to town
with Mr. and Mrs. Pawlak

Bridge Match

A duplicate bridge match
was played at the Lion's Club
on Wednesday night between
local players and teams from
Ardina Valley. In this form of
bridge the element of luck is
largely discounted by the cards
being placed; auction bids are
allowed and the play to a great
extent depends on the skill of
the players.

Messrs. Cameron, Rauch, Mc-
Eneaney and Acton played Roy
Peters, J. Gibson, Chas. Walden
and D. Graham, of Ardina Val-
ley. The Ardina Valley players
were the winners.

Messrs. Verne and H. Hall-
man, Bill Pears and Mr. Driger
played W. Arthur, W. For-
quest, J. Gay and L. N. Natchett
and others. The Empress play-
ers won by a good margin.

Bazaar Is Success

The Ladies' of the Congrega-
tion held a very successful
Bazaar and Tea in the United
Church building on Saturday
afternoon. They received very
good patronage, and wish to
thank all who helped to make
a success of this event.

Maternal Mortality

The death of a mother is the
greatest tragedy that can occur.
The loss of the mother brings
in its train so many social ills
that it is beyond our ability to
put its far-reaching results into
words.

Unfortunately, such tragedies
are not uncommon. In this
country, six mothers lose their
lives for every thousand child-
ren born alive. The appalling
thing about these deaths is that
many of them need not occur,
as it is possible to prevent
them.

To the woman herself, and to
her family, it may appear as if

white tail.

she had been struck down by a
bolt from the blue. What has
actually happened is that a
condition develops, but goes un-
noticed until serious symptoms
manifest themselves.

When the expectant mother
is under the regular supervision
of her doctor, he can detect any
abnormal condition from the
start, and he can, by proper
treatment, prevent the develop-
ment of any serious condition.

This is one reason—and it
should be a sufficient one—
why every expectant mother
should have prenatal care. By
prenatal care we mean that
thoroughness from the earliest treat-
ment of abnormal conditions.
It also makes for a more com-
fortable pregnancy if the woman
follows the advice that the
doctor gives her.

Prenatal care is preventative
care. It allows, as we have
pointed out, for the early treat-
ment of abnormal conditions.
It also makes for a more com-
fortable pregnancy if the woman
follows the advice that the
doctor gives her.

as being anything but normal
during that period. This is all
true, but it does not follow
that in the performance of a
normal body function, medical
help and guidance are not need-
ed.

Eating is a normal process
which we carry through sever-
al times a day, and yet we
know that most people need to
be helped by following some
intelligent direction as to the
selection of their foods. Di-
gestion is a normal function of
the body which usually goes on
without our being aware that
it is taking place, yet, once in a
while the digestive process gets
out of order, and then we need
medical help.

We would say to expectant
mothers that it is quite right

Bring Home Superb Heads

The hunter or sportsman in full swing in the Province of Alberta. In the middle of October, a party of four men, led by the Gray Rocks Inn, St. Andrew, went to a trap line to trap the moose. They got a big surprise and one of the brightest moments of their career as hunters of the game. One of the party secured a moose with the magnificent spread of 60 1/2 inches and another of them shot a 60 1/2 inch head and the third also got a trophy which though smaller than either of the other two, would have ranked high in any average moose hunt. They report that the section is unusually well stocked with the big animals. They report that the party was to get quickly into the trap line with all its pleasurable hardships or portage, camping out, extending one's way through unknown or almost unknown territory and with the excitement of the chase and the excitement against the instinct, sagacity and wisdom of the moose. They have been told of a moose for hundreds of miles in the North. Lay-out shows the head moose spread with hydroplane in background, and Tom Winter, proprietor of the Gray Rocks Inn, with guide.

for them to consider their condi-
tion as normal, but that they
should not forget that what
they want to do is to keep nor-
mal. The best way to main-
tain the normal condition and
to prevent any serious abnor-
mality is through the prenatal
care which the family doctor
gives.
